PROFESSIONAL SUMMARY

Software Developer with hands-on experience designing, building, and deploying scalable full-stack web applications. Strong foundation in computer science fundamentals, software engineering principles, RESTful APIs, databases, and problem-solving, with the ability to quickly learn and adapt to new technologies and frameworks. Recently expanded expertise into containerization and orchestration with Docker and Kubernetes.

PROFESSIONAL EXPERIENCE

Global Matrix Solution

July 2025 – September 2025

Mern Stack Developer Intern

- Developed responsive and scalable full-stack web applications using React.js, Node.js, Express.js, MongoDB, and Tailwind CSS, translating business requirements into production-ready features.
- Implemented secure authentication and authorization using JWT and role-based access control, enabling secure access to application modules and user data.
- Enhanced backend performance through MongoDB query optimization and efficient database schema design, improving application responsiveness and maintainability.
- Collaborated in Agile development cycles using Git and GitHub, participating in feature development, debugging, testing, and code reviews to deliver high-quality software.

PROJECTS

AI Resume Builder | *Live Demo* – React.js, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed a scalable AI-powered Resume Builder using React.js, Node.js, Express.js, and MongoDB, featuring AI-generated content, 4 customizable templates, real-time preview, responsive design, and PDF export.
- Implemented JWT-based authentication, role-based access control, dynamic resume editing, and RESTful APIs, enabling secure user sessions and personalized resume management.
- Optimized MongoDB indexing and backend query performance, reducing data retrieval latency by 30% and improving template rendering speed by 40% for a faster user experience.
- Built reusable React components with debounced autosave, state management, and asynchronous API integration, enabling seamless real-time editing while preventing data loss.
- Containerized the application using Docker, streamlining local development setup and ensuring consistent environments across build and deployment stages.

E-Commerce | *Live Demo* – React.js, Tailwind CSS, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB, supporting 20+ products with category-based filtering, secure checkout, responsive UI, and order management.
- Implemented JWT-based authentication, RESTful APIs, and CRUD operations for user, product, and order management, reducing API response time by 35% through MongoDB query optimization.
- Designed a responsive admin dashboard for inventory, product, and order management, improving operational efficiency and increasing page interaction speed by 40%.
- Developed dynamic cart management, real-time state synchronization, and seamless checkout functionality, ensuring accurate order processing and an enhanced shopping experience.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C/C++

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Redux Toolkit, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, CRUD Operations

Databases: MongoDB, MySQL

DevOps & Containerization: Docker, Kubernetes

Platforms & ITSM: ServiceNow

Tools & Platforms: Git, GitHub, Vercel, Render, npm, Vite, VS Code

EDUCATION

Quantum University

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Roorkee, Uttarakhand

August 2022 – June 2026
